

Mulberry Shelter

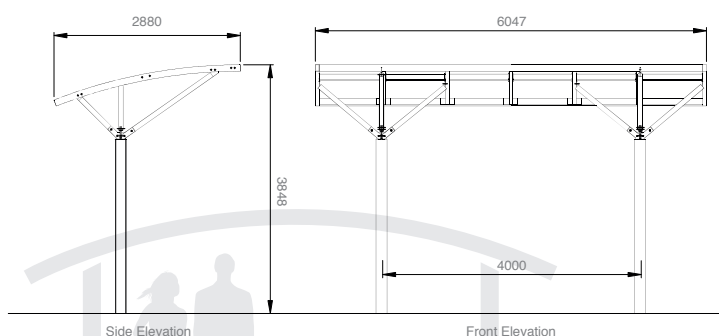

The Mulberry's modern design and versatility allows the shelter to be used with various combinations of cycle stands or racks, to create a stylish yet practical cycle store. It can be configured as a twin 'back-to-back' style arrangement to provide greater storage capacity.

The main roof supports are fully welded tubular 'branch-spurs', which bolt to the main connection plates at the top of the support columns which provide an option for a curved or pitched roof

The standard shelter spans 6m in length giving a 4m central section to suit a standard cycle rack with room at each end for locker storage. The Mulberry can also be adapted to suit a curved area. For larger areas additional 4m extension modules can be added to increase its length and capacity.

Mulberry shelters are manufactured from structural grade mild steel. They can be supplied in various finish coating options and can be provided with accessories as listed below, (contents not included).

Dimensions

Available Extras

- 5 Hoop Cycle Rack
- Double Tier Rack
- Pram Rail
- Helmet Lockers
- Solar Lights
- Notice Boards
