

Carolina Cycle Compounds

The Carolina is our most popular and versatile cycle shelter. When combined with either the Cedar or Cypress Shelter (as illustrated above) it creates a much larger and aesthetically pleasing cycle compound. End panels and security gates can be provided for added protection. Carolina Compounds are designed to individual preference and requirements. Our sales team will be pleased to provide assistance in the design to suit the area available.

Carolina Cycle Compounds and their combined units are manufactured from structural grade mild steel. They can be supplied in various finish coating options and can be provided with accessories as listed below, (contents not included).
